

AI Usage DISCLOSURE FORM

1. Team Details

Team Name: SYNTAX ERROR

Project / Product Name: Distributed-Root-Cause-Investigator

Submission Date: 08/05/2026

2. AI Usage Declaration

Did your team use any Artificial Intelligence (AI) in developing this project? Yes / No

YES

3. Purpose of AI Usage

Idea generation / brainstorming: Used Gemini, Claude Opus and OpenClaw to assist in writing PyTorch models, Flask API, and React dashboard code. All code was reviewed and modified manually.

Code generation or assistance: Leveraged AI to generate boilerplate code for the PyTorch neural networks which are built from scratch, the Flask REST API endpoints, and the React + D3.js dashboard.

UI / UX design: Used AI to assist in creating the React component structure, Tailwind/CSS configurations, and the glassmorphism dark-mode aesthetic for the dashboard.

Content creation: Used AI to help draft the README and project documentation.

Data analysis: Used AI to help formulate the statistical ensemble logic (Z-Score + EWMA) and cross-correlation lag analysis for causal inference.

Testing / debugging: Used AI to help debug PyTorch errors, React rendering issues, and data generation bugs.

4. Feature Origin Classification

1. Feature Name: PyTorch ML Models (LSTM Anomaly Detector + Transformer Log Classifier)

2. Self-Generated/AI-Generated/Both: Both

3. Description: Used Gemini, Claude Opus & OpenClaw to generate base PyTorch model code. We manually tuned hyperparameters, wrote training loops, and integrated into the pipeline.

5. Ethical & Compliance Confirmation

AI usage complies with guidelines and policies. **Yes**

No proprietary or copyrighted data misused. **I Agree**

6. Declaration & Sign-Off

Name of Team Representative:

MAYANK BAJAJ

Role:

TEAM LEAD

Signature

A handwritten signature in black ink, appearing to read 'Mayank', with a stylized flourish at the end.

Date:

08/05/26
